

Dear parents, children and teenagers

Welcome to our paediatric practice in Aachen-Burtscheid.

We are pleased to introduce our team and our practice on this website. Here you can find information about our main focus and the range of services that we offer.

It is our aim to ensure that your child grows up healthily and in good care. We want to accompany and support you and your family during your journey through life. Particular emphasis is placed on medical check ups and disease prevention for all of our patients, from premature and new born children up to adolescents and young adults.

In doing so, we also focus on the medical care of patients with particular neurological features and delayed development.

As part of our holistic approach we make use of the more scientifically oriented “conventional medicine” as well as the additional options that classical homoeopathy offers for treatment of acute and chronic diseases.

We want you and your children to feel that you are in good hands and well looked after in our practice in Aachen and hope that the information provided on our website helps!

We look forward to welcoming you and your children to our practice!
